

MV23

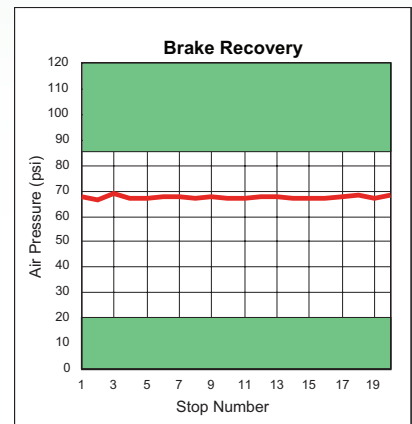

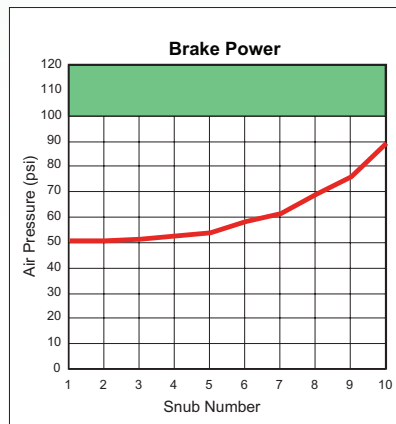

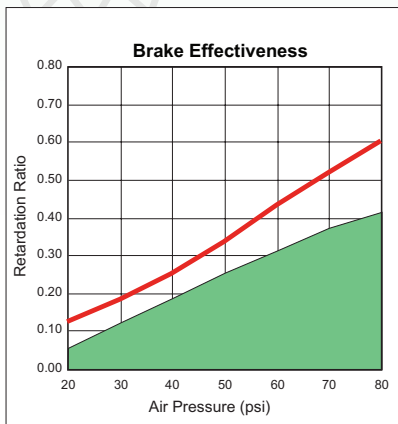

Standard grade brake linings designed for 23,000 lb axle load applications

MARATHON MV23 STANDARD GRADE LININGS meet the requirements of FMVSS 121 dynamometer testing standards at 23,000 lbs. MV23 is designed for price sensitive fleets that require a 23,000 lb material. MV23 is also suited for low powered brake systems that require a more aggressive lining.

FMVSS 121 TEST RESULTS

Testing conducted in accordance with FMVSS 121 criteria @ 23,000 lb axle load: 16 1/2 x 7 inch S-cam air brake; type 30 air chamber and 5.5 inch slack adjuster and a 20.8 inch tire rolling radius. Shaded area indicates non-compliance.
