# Marathon Spring Brakes

Premium quality Marathon Spring Brakes are designed to provide a long service life with reliable and durable braking performance. Manufactured in an OEM facility, these spring brakes feature superior, engineered materials and a corrosion resistant coating to ensure an extended service life.

Marathon offers a 30/30 complete brake and a 30/30 piggyback kit to handle the majority of your spring brake needs. The brakes utilize an aluminum center body that is durable and corrosion resistant, yet lightweight. The design of our spring brakes provides for extra support at the critical bolt-on area where failures often occur. All Marathon spring brakes are backed by a one year warranty.

## Spring Brake Features
